HOW TO USE AI & AI ETHICS

How to Use AI to Help, Not Hinder, Learning

Motivation, memory and appropriate use of generative AI

Group 1 · Topic presentation

INTRO VIDEO

[Insert the 1-minute intro video]

MEMORY CHALLENGE

Remember these 10 words. No writing.

cat	umbrella	volcano	bread	key
rainbow	clock	bicycle	pineapple	candle

SESSION PLAN

Three questions for today

Minutes	Content	Activity	Led by
0 to 5	Opening	Video, memory challenge	Phúc
5 to 18	1. Motivation in learning	Discussion	Huyền
18 to 40	2. Forming, retrieving and retaining knowledge	Game: Help or Hinder?	Huyền, Hân
40 to 60	3. Appropriate use cases	Game: AI Doctor	Hân, Trúc
60 to 72	Debate	Two teams	Trúc
72 to 90	Quiz review and conclusion	Quiz, Q&A	Trúc, Ngọc

1. MOTIVATION IN LEARNING

How AI supports motivation

Personalised paths	Adapt pace and challenge
Real-time feedback	Feedback and scaffolding support struggling learners
Interactive tools	Chatbots and adaptive exercises increase engagement

1. MOTIVATION IN LEARNING

Risks: how AI can undermine motivation

Over-reliance	Reduces initiative and deep thinking
Less ownership	Students may feel the learning is not theirs

How AI can help

Forming memories	Ask AI for metaphors to understand new, unfamiliar content
Retrieving memories	Use AI to organise your thoughts and draft content for an essay

How AI can hinder

Disrupts memory	Breaks forming, retrieving and storing, so we forget or struggle to recall
Cutting corners	Saves time but reduces the learning experience

GAME · ROUND 1 OF 2

Help or Hinder?

1

Read the student situation.

2

Green card = helps. Red card = hinders.

3

Name the point from our lesson = 1 bonus.

GAME · ROUND 2 OF 2

AI Doctor

Martina

Not interested, too busy. ChatGPT wrote her essay.

Greg

Thinks he cannot write. Copilot wrote his essay.

Louisa

Full-time job, sick child. Did not submit.

How could each student have used AI to help, not hinder?

3. APPROPRIATE USE CASES · CASES 1 AND 2

Martina and Greg

Greg	Use Copilot to help him write the essay, not to write it for him
Martina	Chat with an AI chatbot to raise her interest, find value in the task and make it easier

Louisa

1

Dictate her thoughts with speech-to-text in the ChatGPT app

2

Give her outline to the chatbot

3

Ask it to help edit the dictated draft

DEBATE

"AI makes students less motivated to learn."

2 min	**1 min**	**3 min**	**Vote**
Opening, each side	Rebuttal, each side	Open floor	Class decides

QUIZ REVIEW

10 questions. One winner.

Join at [quiz link] · PIN [_____]

MEMORY CHALLENGE

Write down the 10 words from the start.

30 seconds. How many do you still have?

CONCLUSION

Use AI to help, not hinder

Motivation	Let AI personalise and support, but keep your own initiative
Memory	Use AI to form and retrieve ideas, not to skip the thinking
Use cases	Help write, raise interest, dictate and edit, never replace
